

# Chemical Bunding Systems

**PLASPOKE**  
Bespoke Plastic Fabrications & Designs

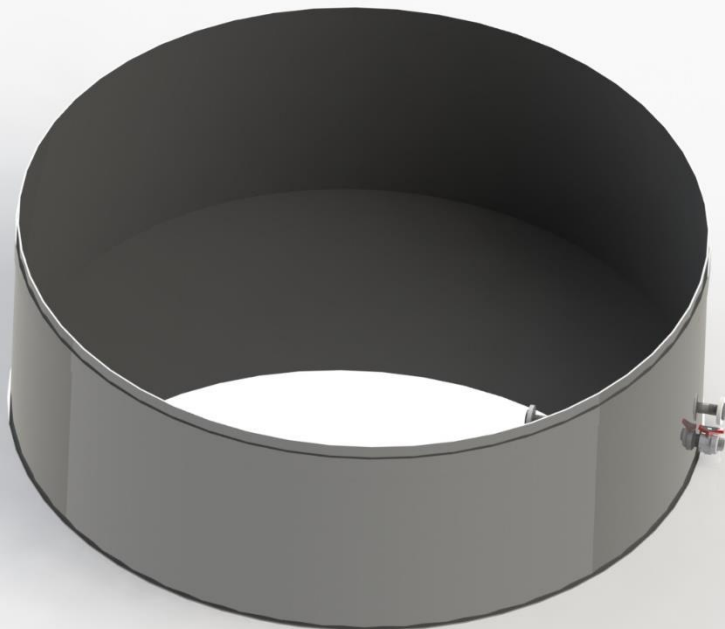

Ensure complete safety and spill control from various hazardous substances with a PLASPOKE chemical bunding system, specially designed to meet WorkSafe Design standards.

Plaspoke carefully design and engineer custom chemical bunds for a range of industries, with a range of add-ons and customisable options to suit your needs.

Our bunding systems can be manufactured from a range of virgin grade plastics that are suitable for almost all class 5, 6, 8 and 9 chemicals and can be fabricated around existing plant and machinery. All our bunds are designed to exceed WorkSafe specifications for volume and splash angle requirements.

We can custom fabricate standard chemical bunds in-house, or for larger projects talk to us about a custom onsite build to ensure that we take full advantage of the site space available, while saving you money and time.

## A Sample Tank Bunding

### What sets us apart:

- Significantly cheaper than other custom fabricators in the market
- Production certificate with every bund.
- Onsite custom bund fabrication for larger fitouts
- **10 Year** workmanship guarantee
- **25 Year** design life

### Available Additions:

- Removable dosing cabinets with pipework
- Internal tank hold downs to prevent floating in overflow
- Built in mounts, plinths & upstands
- Internal pipework & isolation valves
- Built in day tanks

Plaspoke can usually provide a quote within 1 working day, are significantly cheaper and deliver solutions faster than anyone else in the market. For a free quote, contact us today!
