

Bespoke Fabrications

PLASPOKE
Bespoke Plastic Fabrications & Designs

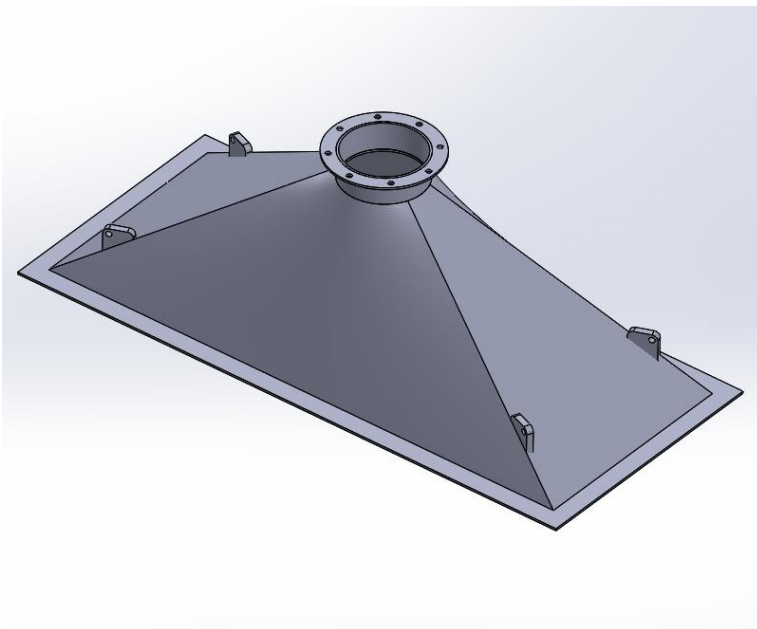

By utilizing years of experience along with innovative computer aided design (CAD), we can develop solutions that deliver results no matter how unique your idea may be.

Plaspoke is one of the industries fastest growing bespoke fabrication companies. This is because our focus on design not only lets us take on more complex projects, but also helps minimise the cost of our smaller ones. By ensuring what you get works first time without over-engineering it “*just in case*”, we save our clients time, money and stress with every product we produce.

From a small custom battery box for your holiday boat to an industrial grade chemical fume extraction system, there is no problem too small or big we can't solve.

All new builds are manufactured from premium virgin grade plastic to ensure a consistent quality throughout our business. For larger fitouts talk to us about a custom onsite build which ensure that we take full advantage of the site space available, while saving you money and time.

Bespoke Chemical-Grade Fume Hood

What sets us apart:

- Significantly cheaper than other custom fabricators in the market
- Fully customisable
- Quick, free, no-obligation quotes
- Production certificate & guarantee with every product.
- A fast turnaround for any sized fabrication project
- Onsite fabrications for larger fitouts or made-to-suit orders
- Avoid costly rework time & cost by utilising our CAD abilities

For any enquiries big or small, contact one of our friendly team at sales@plaspoke.co.nz and we will get back to you as soon as possible.
