

IBC & Barrel Spill Control Bunding Systems

PLASPOKE
Bespoke Plastic Fabrications & Designs

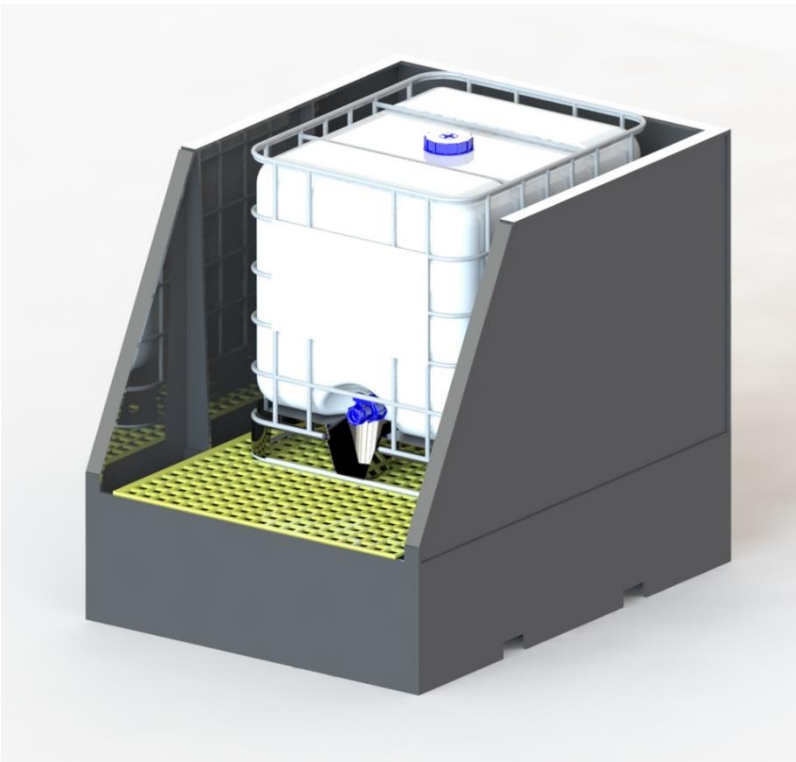

Ensure complete safety and spill control from various hazardous substances with a Plaspoke IBC & barrel bund, specially designed to meet Worksafe requirements and top plastic fabrication standards.

Plaspoke offers a range of carefully designed, fully customisable IBC, barrel & tank spill control and bunding systems.

Manufactured from premium virgin grade plastic, they are compatible with almost all class 5, 6, 8 and 9 chemicals. All our bunds are designed to exceed the splash angle and bund capacity to meet HSNOCOP 47 requirements and can be engineered to meet the specific gravity of any chemical you require.

Choose from our range of standard single or double bund designs, for both IBC's and barrels. Or for larger projects that require more bunding capacity, talk to us about a custom onsite build to ensure that we take full advantage of the site space available, while saving you money and time.

A Standard Single IBC Bund

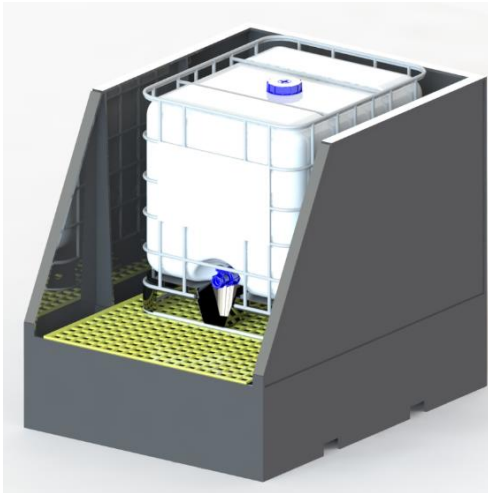

What sets us apart:

- Significantly cheaper than other custom fabricators in the market
- Fully customisable
- Quick, free, no-obligation quotes
- Production certificate with every build
- A wide range of add-ons available
- A range of standard options for quicker turnaround
- Onsite custom bund fabrication for larger fitouts
- **10 Year** workmanship guarantee.
- **25 Year** design life

To make things simple we have a range of standardised sizes and add-ons available, helping us to provide quotes usually within 24hrs, and deliver solutions faster than anyone else in the market.

IBC & Barrel Bunding - Details

SINGLE IBC & BARREL BUNDS

Plaspoke single Bunds can be come in a range of standard options to suit IBC's, barrels or both. These can be engineered to hold almost any class 5, 6, 8 or 9 chemicals.

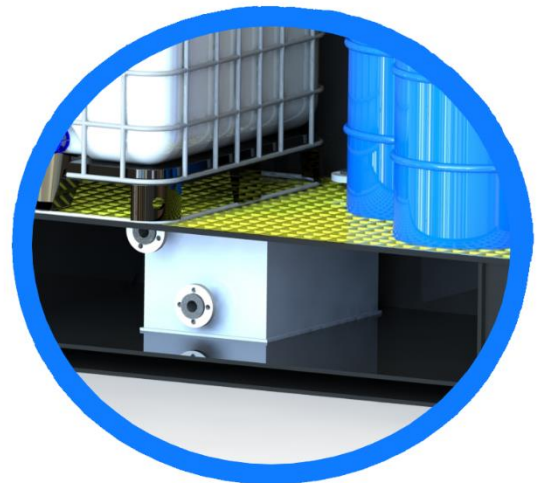

DOUBLE IBC & BARREL BUNDS

Plaspoke double Bunds are the cost-effective solution when multiple IBC's or barrels need safe storing. With variations to suit a range of chemical densities, you only pay for what you need.

FORKLIFT CAPABLE DESIGNS

Our full range of IBC and barrel bunds have the option of forklift compatible lifting base. Especially spaced to fit any forklift, we make moving your bunding quick and convenient.

100L & 250L DAY TANK OPTIONS

With our 100L or 250L day tank options you can ensure production is never caught short. These tanks act as a "buffer" so your system can continue to run while the IBC or barrel is switched over.
